

Dear Receiver Damian,

████████████████████ is a site partner and claimant under the Income Store Receivership. ██████ funded its contract in April 2019 in the amount of \$500,000 and was **never assigned a website** by the Income Store staff. Furthermore, ██████ only received 4 payments of \$8,334 (Aug, Sep, Oct, Nov) from Income Store as payments under the contract.

█████ believes that it and similarly-situated site partners are **more seriously aggrieved** than other site partners who had websites assigned to them, and/or who received guaranteed payments over a longer period of time.

█████ also believes that the likely cash recovery from the liquidation process will be very small and therefore **we prefer to receive a website or websites** in satisfaction of our claim.

The proposed claims process offers the opportunity for ONLY CERTAIN site partners to receive a website in lieu of a cash claim. Those site partners appear to be the ones who (merely by virtue of the earlier timing of their investment) were assigned a website by the Company. We believe that the proposed claims process penalizes site partners like ██████ who were not yet assigned a website, but would accept one (or more) in satisfaction of their claim.

If the proposed claims process is approved as is, ██████ and others similarly situated will not be able to receive an income-producing asset, but rather will be forced to wait for the liquidation process to conclude before receiving a cash payment.

This process unfairly rewards site partners who already have sites (who in general are better off than those who did not) and penalizes those (like ██████) who were not assigned sites.

Therefore, **we propose that the claims process be amended to allow site partners who were not assigned websites the opportunity to claim sites now, on a preferential basis, rather than waiting until the liquidation process** when parties like ██████ will be forced to compete with all of the other liquidation bidders on a non-preferential basis.

Sincerely yours,
